

Dear Recruiting Manager at Affirm:

I am writing to apply for the position of Senior Business Intelligence Analyst. I believe that I have the expertise that you are looking for. For the previous two years, I have been working for Wayfair, one of the largest e-commerce companies in their supply chain department to build models using python, and define metrics, building dashboard with SQL, Tableau, R. I believe these experiences will be successfully transferred into the position that I am applying for.

**What you are looking for:**

Experience in SQL

Experience in python or R

Experience in data visualization

**What I will offer:**

I have extensive knowledge in building SQL tables and Google big query; I understand the importance of a clean table for the performance of the dashboard. Here is a snippet that I am allowed to show for my work.

I have been a python developer for Wayfair's supply chain organization. I have a solid grasp on version control, and the most utilized packages in python, such as pandas, hydra (for configuration), sklearn, pytorch, etc.

I have been the leading tableau and google data studio dashboard developer for my team since I got my hands on them. Here is one of the working example that I am allowed to show

Additionally, I am a good teammate that isn't shy to help other people with my technical skills. I have held session to teach my co-worker on building dashboard in tableau and running queries in Google Cloud. I would be more than happy to Affirm if the opportunity is given. Please contact me at zhanren@umich.edu or call me at 612-886-5382.

Best,  
Zhanren
